

To become Powered By Rescale reach out to us at: <https://rescale.com/partners/powered-by-rescale/>

“The reliance on computer simulation technology to maintain competitiveness has increased dramatically, however, managing the execution of engineering simulation at scale on-premises has become a challenge. Cloud computing offers scalable and flexible hardware and software resource access. Developed in partnership with Rescale, Nexus Compute will bring our world-class engineering simulation software to the cloud, making it easier for our customers to access the tools they need to drive product innovation and improve their competitiveness.” -Hugues Jeancolas, VP of Product Management, Hexagon Manufacturing Intelligence

Powered By Rescale Partners

Powered By Rescale Additional Features:

- Full Stack Support
- Dedicated Customer Success Engineer
- GTM Planning and Enablement
- Benchmarking and Performance Profiling
- Comprehensive Visibility and Control
- Policy Driven Admin Controls

Powered By Rescale

The engine to enable cloud transformation

Powered by Rescale enables our partners to harness Rescale’s High Performance Computing (HPC) built for the cloud technology, transforming their business through new business model creation and driving innovation.

Powered By Rescale is built to enable Hardware Manufacturers, Software Providers, System Integrators, and Managed Service Providers to integrate into Rescale’s HPC Built for the cloud by API or Rescale’s GUI with options for white labeling, providing a full stack solution.

Problems We Solve

Customers are looking for cloud based simulation services and organizations need a pathway to migrate from on-premise and add the ability to burst to cloud for additional capacity and the flexibility to access new architectures. Powered by Rescale is the platform that enables this transformation with cutting edge hybrid cloud orchestration and deployment of R&D simulation SaaS.

Powered By Rescale provides features that enable our partners to unlock their organizations potential by allowing them to focus on their unique value and letting Rescale handle the lift to cloud and compliance.

What we Power

- Burst Capabilities to Cloud
- Multi and Hybrid Cloud coordination
- White Label of Rescale Platform
- Full API Integration
- Transformation to SaaS model
- Consumption based revenue streams
- On Demand Licensing
- ITAR, and NIST 800-171 compliant Platform
- FedRAMP Moderate Authorized
- Access to Rescale software catalog (over 1000 applications installed and optimized)*

<h3>Hybrid & Multi-Cloud Deployment</h3> <p>Our hybrid and multi-cloud solutions provide you with the flexibility to choose the cloud infrastructure that best suits your specific requirements. Whether it's a combination of public and private clouds or multiple public cloud providers, we have you covered.</p>	<h3>White Label and API Integration</h3> <p>Seamless integration into your customer's existing workflows. Enhance your offering and expand</p>	<h3>Fast Track to Government Contracts</h3> <p>Leverage Rescale's ITAR and FedRAMP Moderate Authorized environments and remove the time and cost burden to working with the Federal Government.</p>
---	--	---

With targeted offerings for hardware manufacturers, independent software vendors, and consulting firms Powered By Rescale has the tailored offering that is right for you business. Allow Powered By Rescale to be the conduit to a secure virtually unlimited compute and focus on customer facing activities.

Powered By Rescale Overview

Rescale Secure Compute Environment

Joining Powered by Rescale provides access to Rescale's industry leading security certifications, allowing you to go after previously unattainable contracts with no additional investment or time required. Powered by Rescale offers a fully ITAR, HIPAA, and FedRAMP Moderate authorized platform you can access today. Take the guesswork out of compliance and accelerate your time to market today.

OUR SECURITY CERTIFICATIONS

Rescale currently has FedRAMP Moderate Authority to Operate (ATO), SOC 2 Type 2 certification, and ISO 27001 certification. Each of these requires third-party independent auditors to verify our level of cybersecurity and secure systems management, including comprehensive penetration testing and validation of our systems.

A collection of security certification logos including AICPA SOC, DFARS Compliant, CSA cloud security alliance, ITAR, FedRAMP, and HIPAA.

How to Get Started

We are 'Powered by Rescale,' and we ready and energized to power your digital transformation. Join us on this journey, where cloud-based HPC is the key to unlocking new horizons in business and innovation. Together, we will redefine what's possible and revolutionize the world of high-performance computing. Reach out at <https://rescale.com/partners/powered-by-rescale/>
